Mammut – Worldwide Partner of IFMGA

**MAMMUT**  
**150 YEARS**

# The Biggest Peak Project in History

## Leave your tent, get set, go!

Mammut is going to be 150 years old. Instead of celebrating this anniversary with coffee and cake, Mammut is inviting outdoor enthusiasts from all over the world to the planet's most beautiful mountains: 150 teams are climbing 150 mountain peaks. The curtain-raiser took the form of an ascent of the Jungfrau from different directions with the largest base camp ever assembled. And there were many famous names playing an active role. Equipped with the new Peaks Collection and led by certified IFMGA mountain guides, the teams experienced an adventure of a lifetime but also built on essential values, such as solidarity and teamwork.

# 100

**Years of the Jungfrau railway:** On February 21<sup>st</sup>, 1912, the miners broke through the end of the tunnel, saw the sky above the Jungfrauoch and achieved one of the greatest triumphs of modern engineering.

# 150

**Years of Mammut:** Kaspar Tanner laid the foundations of the company in 1862 with the establishment of his traditional rope work in Dintikon near Lenzburg. Nowadays, Mammut is a globally active business offering innovative products to outdoor and mountain sports enthusiasts.

# 200

**Years since the first ascent of the Jungfrau:** On August 3<sup>rd</sup>, 1811, the brothers Johann Rudolf and Hieronymus Meyer, and their guides conquered the mountain starting from the Lötschental. Today, climbers ascend a very similar route as the historic ascent. This historic route is almost exactly the same as the normal route used today.

## To be won!

Read about the summit tours in this flyer, go online and win some great Mammut prizes!

[www.mammut.ch/win](http://www.mammut.ch/win)

### Fujiyama Jacket Women

Modern design based on a climbing rope | 100% functionality with a contemporary feel | Innovative color blocks | 2 different color schemes

01 Diagonal 2-way front zip

02 Splash-proof 2-way underarm zip

03 Pre-shaped sleeves with Velcro closures

04 2 backpack-compatible zip-up pockets

05 3-layer GORE-TEX® Pro Shell®

06 Light and space-saving to pack

### The Anniversary Book

To celebrate its 150th anniversary, Mammut is issuing a collection of 150 mountaineering and outdoor sport stories by well-known authors. The history and future of mountain sports are illustrated in this unique volume of photos and texts.

## Jungfrauoch

3471 m | Bernese Alps | Switzerland

# The Biggest Peak Project in History

## Summit meeting of sport, politics and economics.

Famous names on mountain slopes: Leading international mountaineers and well-known personalities from the world of sport, politics and economics took part in the starshaped ascent of the Jungfrau. This climb represented the start of Mammut's 150th anniversary celebration. And what mountain could be better suited to such an event as the Jungfrau which was climbed for the very first time 200 years ago?

A window of good weather appeared in the morning. So it was up out of the sleeping bags, have breakfast, pack lunch and form the rope teams. The teams then set off on the route via the Rotbrett, Rottal and south-east ridge; led by distinguished mountain guides such as Dani Arnold and Stephan Siegrist. Between 7 and 8.30 a.m., in perfect conditions, all the rope teams reached the summit, including two teams wearing the historical clothes worn by the original pioneers.

Mammut does not just want to celebrate, it also wants to help. 1% of the profits from the Anniversary Book and the Peaks Collection will be donated to projects in emerging nations such as Kyrgyzstan and Peru. This will help to provide sound training and modern equipment for mountain guides. As a partner of the International Federation of Mountain Guide Associations (IFMGA), Mammut is supporting local mountain guides.

we care  
MAMMUT

Hurrah, yippee!

No, not 1811, but 2011!

Undercover celebrities.

Enjoying the summit together.

It's not only the sun that's smiling.

Team spirit and solidarity on the mountain.

**Tasman Jacket Men**

Wind-blocking, breathable SOFTech material | 3 zip-up pockets | Zipped underarm ventilation system

**Redoubt Jacket Men**

Robust and quick-drying exterior | Fleecy soft and warm interior | 1 asymmetric chest pocket

**Maudit Jacket Women**

2-layer DRYtech jacket with nylon face | 2-way underarm zip for optimum ventilation | 3 zip-up pockets | 2-way front zip | Pre-formed sleeves with Velcro closures

**Sajama T-Shirt Women**

Polartec® Power Dry® | Close-fitting design | Active moisture transport prevents quick cool-down | Long front zip

Mountaineering the old-fashioned way.

THE BIGGEST PEAK PROJECT IN HISTORY

**MAMMUT  
150 YEARS**

# Peaks Collection

## Showing solidarity.

The biggest peak project in history deserves to have its own outfit. The Peaks Collection stands for team spirit and solidarity. The asymmetric designs and bold lines are particularly striking when worn by several climbers in the same group. Just like a rope, the colors and shapes interact. This emphasizes the mutual responsibility and solidarity of a rope team in the mountains.

### Gasherbrum Jacket Men

A real eye-catcher. The high-end jacket from our 150 peaks anniversary collection! Featuring the ultimate mixture of high-quality GORE-TEX® Pro Shell® and the new asymmetric design, the Gasherbrum jacket is sure to become your favorite item of clothing!

### 9.5 Swiss Rope

A limited anniversary edition of the Swiss sports climbing rope. Very good properties and optimal handling thanks to the superDRY™ finish

06 Tailored, adjustable hood

05 Light and space-saving to pack

04 Underarm ventilation with spray-proof 2-way zip

03 Preformed sleeves with Velcro closures

01 2-way front zip

02 3 zip-up front pockets

### Mamook GTX®

Base Fit® | Asymmetric lacing | Hybrid shell | Motion Control® | Carbon insole | Crampon-compatible

### Taranaki

Lightweight mountaineer's backpack fully equipped for alpine use | Narrow lines and body-hugging fit for great freedom of movement

# Eiger Extreme

## High-tech clothing.

Photo: Thomas Sant

The Eiger Extreme collection was developed to encourage peak performance. The new collection offers exciting innovations and high-quality equipment for using in mountainous terrain. And these advances won't weigh you down. Continuous developments have helped to reduce the weight of many items even further.

**Eiswand Zip Pull Light Men**  
**Schneefeld Zip Pull Light Women**  
 Lightweight fleece pullover made from Polartec® PowerDry® | Ideal as a first layer | Covered chin protector | High-cut collar

**Felsnadel Half-Zip Jacket Women**  
 Extremely lightweight 3-layer GORE-TEX® Active Shell® | Maximum breathability | Reliable weather protection | Innovative zip

**Eisfeld Pants Light Men**  
 Extremely breathable schoeller® Soft Shell pants | Robust, elastic Dryskin® material with Cold Black technology

**Eismeer Pants Light Women**  
 Extremely breathable schoeller® Soft Shell trousers | Robust, elastic Dryskin material with Cold Black technology

### GORE-TEX® Active Shell®

Clothing equipped with GORE-TEX® Active Shell laminates is ideal for one-day activities involving very high levels of physical exertion. It is specially designed to ensure extreme breathability, and therefore offers comfort with guaranteed lasting protection from water and wind.

**Trion Nordwand 35**  
 Weather-resistant, versatile, well-equipped and very robust alpine backpack | Weatherproof thanks to the roll-top lock and sealed seams

**Nordwand TL**  
 Complete range of technical features | This full-gaiter boot is the lightest in its category, making it a perfect fit for the Eiger Extreme range

**MAMMUT**  
**150 YEARS**

THE BIGGEST  
PEAK PROJECT  
IN HISTORY

021/150

**Osjecenica, 1,795 m, and  
Klekovaca, 1,962 m, Bosnia**

Community tour in Bosnia to a  
mountain whose rock formations  
look like a mammoth!

**Kento Jacket Men**

Weather protection jacket for reliable protection in high mountain terrain | DRYtech™ stretch

**Keiko Jacket Women**

Fixed, adjustable hood | 2-way underarm zip for optimum ventilation

**Shirko Jacket Men**

Not a gram too much, thanks to the new 3-layer GORE-TEX® Active Shell® quality

**Runbold Pants Men**

Bi-elastic hiking and traveling pants made from abrasion-resistant and robust nylon material

**Runje Pants Women**

Bi-elastic, quick-drying hiking and mountain pants | Made from tear-resistant nylon

**Consus Pants Men**

Sporty, hard-wearing hiking pants | Made from tear-resistant nylon with carbon finishing

**Polartec® Power Stretch® Pro™**

Fashionable, abrasion-resistant and extremely warm. The Polartec® Power Stretch® Pro™ material used by Mammut is one of the most abrasion-resistant and warmest materials in this category. Thanks to their special design and nylon face, all Aconcagua and Denali items are extremely durable and therefore perfect for demanding outdoor activities.

# Mountain Clothing

# In the mood for the mountains.

Photo: Robert Bösch

For total hiking enjoyment: Mammut clothing is compact, durable and extremely comfortable to wear. Although lightweight, there are no compromises in terms of quality. High-tech materials ensure an optimum body temperature whatever the weather.

## Aconcagua Hoody Women

Fashionable hoody in proven Polartec® Power Stretch® Pro™ quality with a robust nylon face | Light and robust with an optimum weight-to-heat ratio, it is the ideal companion the whole year round

**Barb T-Shirt Women**  
Light Dri-release® material | Easy to look after, quick drying and very stretchy | UV protection UPF 40+

**Runje Bermudas Women**  
Bi-elastic hiking and traveling shorts | Made from abrasion-resistant nylon material | Many spacious pockets | Quick-drying | Breathable

**Sol Hat Women**  
Dependable sun protection when on the move

**MAMMUT**  
150 YEARS

# Climbing Clothing

## For the vertical catwalk.

We all know that it is not just the difficulty rating that is important when climbing. Time also plays a crucial role. But what about style? Thanks to Mammut's new climbing skirt, women climbers now make a great impression on the cliffs when it comes to fashion as well.

**Microlayer Half-Zip Jacket Women**  
Ultra-lightweight, windproof and water-resistant nylon fabric | Extremely tear-resistant and breathable | Easily stowed in the chest pocket

**Go-Far Hoody Men**  
The perfect hoody for a day in the cliffs | Pleasantly warm thanks to Polartec Thermal Pro®

 THERMAL PRO®

**Gamie Pants Women**  
Climbing pants with excellent anti-abrasion properties | Pleasant, natural feel | Great freedom of movement | Quick drying

**Ceredo Pants Men**  
Quick-drying climbing pants made from nylon with elastane and internal waistband adjustment

### The first climbing skirt – Refine Skort Women

With its fashionable climbing skirt, Mammut is presenting a feminine look for the cliffs or climbing gym. Made from highly stretchable material, featuring an antibacterial treatment and integrated shorts, this practical garment offers the wearer maximum safety and freedom of movement to support every climbing action.

**01** Women's Secret Pocket: small pocket for coins or keys

**02** The skirt covers the integrated shorts on which the leg loops of the harness are positioned

**Fight-Gravity Top Women**  
Sporty top with stabilizing insert and a modern two-tone design | Lightweight Dri-release® material, easy to care for and quick drying | UV protection UPF 40+

**Seile T-Shirt Men**  
T-shirt with soft cotton quality | "Used-feel" print shows old Mammut rope factory logo | UV protection UPF 30+

**Rumney Shorts Men**  
Climbing shorts made from a combination of nylon and cotton | The elastane in the fibers and elastic insert provide freedom of movement | Fast drying thanks to the Quick Dry finish

**Mindo Hat Women**  
For hot summer days. Light, airy linen/cotton hat with UV protection

**Paq Cap**  
Cool, youthful cap for sport, leisure and relaxation

**Zion Original Headband**  
Perfect for practical use | Whether as a cap, headband or neckband, a small accessory that is very useful

**MAMMUT**  
**150 YEARS**

# Technical Hardware

## Vertical innovation.

Innovation in the climbing world is not just a matter of functionality or quality. Maximized weight reduction is equally important. So, too, are production methods that preserve natural resources. Which is why, for us, pants can become a climbing harness or high-quality leftover material can be turned into high-tech ropes with striking color variations.

The professional's choice

In 7 out of 10 World Cups in 2011, an athlete from the Mammut Proteam stood at the top of the winners' podium – wearing Realization Shorts!

### 9.8 Transformer Rope

The 9.8 Transformer is made from transfer yarns, high-quality leftover yarns which are usually disposed of unused due to their color variations. As well as saving valuable resources, each meter of the resulting rope has a unique design.

### Realization Shorts

The sports climbing harness has evolved – Mammut's Realization shorts are the first to combine climbing harness and shorts. The shorts offer top performance as both a harness and an item of clothing: The shorts are revolutionizing classic climbing harnesses and introducing a completely new look in climbing.

### Accessory Cord – Transformer

The cord made of transfer yarn offers excellent tear resistance coupled with minimized stretching, easy tying and outstanding durability

### Transformer Sling PA 16

Thanks to the use of high-quality transfer yarns, this sling makes a positive contribution to any user's ecological footprint

### El Cap

Stylish climbing helmet with visor and narrow design | With innovative 2K-EPS core for maximum absorption and the greatest possible safety

### Togira Slide

Versatile all-rounder for women | Special design ensures outstanding comfort | 3 slide bloc buckles permit a wide range of adjustments

# Via Ferrata

## Safe whatever happens.

Photo: Robert Bösch

For outstanding via ferrata safety. The next generation of proven Mammut Tec Step sets incorporates the latest safety research findings. The risk of injury is reduced thanks to the optimized brake force curve and lower impact force. Mammut Tec Step sets now respond even more gently and protect the body while braking the fall.

### Tec Step Classic

Tec Step set with smooth-functioning, ergonomic, classic quick-locking carabiners

### Tec Step Bionic

This Tec Step set incorporates two high-quality Bionic via ferrata carabiners which can be locked using the ball of the thumb

### Tec Step Bionic Turn

A variant of the Tec Step Bionic with swivel joint to prevent the elastic lanyards from rotating

### Mammut Tec Step – the next step to greater safety

Extensive testing has shown that only a low impact force over a long braking path permits the braking forces necessary to protect the body. This is exactly what is achieved using the Mammut Tec Step sets with their forward-looking, two-stage brake force curve. This equipment guarantees the great safety and peace of mind necessary for real via ferrata enjoyment.

# Backpacks

## The record backpack.

Mammut has the right backpack for every situation. Without exception. The Lithium Z is among the lightest ever backpacks for everyday use, for hiking and, of course, for climbing. A fact greatly appreciated by Dani Arnold when setting a new record time for climbing the North Face of the Eiger in under two and a half hours – with a Lithium Z on his back.

Simply attach to a headlamp to create pleasant diffused light for cooking or reading and the romantic ambience of an evening under canvas

# Sleeping bags | Mats | Headlamps

# Let night fall.

High-quality sleeping bags, mats and headlamps are just as much a part of a truly safe set of equipment as are the right ropes and boots. Because only after a good night's sleep are you able to perform at your best and excel in critical situations. Despite their excellent thermal properties, Mammut sleeping bags are extremely light. So you can relax and dream of reaching the summit.

**150 YEARS**

THE BIGGEST  
PEAK PROJECT  
IN HISTORY

Photo : Robert Bösch

## Mount Baker 3,285 m, USA

Some obstacles are more difficult to overcome than ice, snow and stormy weather. For the tours in the biggest peak project

in history, Mammut USA set the aim of giving individuals with disabilities the opportunity to take part in the peak projects on Mount Baker and Castleton Tower. Mammut received great support from the organisations Paradox Sports and Access Fund as well as the Mammut Dealer Mountain Gear.

Led by IFMGA certified mountain guide Steve Banks, the team's goal was to climb the 3,285-meter-high Mount Baker near Vancouver. Chad Butrick was among the party. Since losing his leg, he has gone through life and been climbing with an artificial limb. This did not stop him from tackling this summit. They would have succeeded, if the weather had not been against them. Shortly before the summit, fog and snow forced the climbers to turn back.

If you would like to find out more about the great performance by Chad and his team, you can watch the exciting video and read the tour report here.

[www.mammut.ch/150years](http://www.mammut.ch/150years)

## Akadake 2,899 m, Japan

A mixed group of Mammut customers, employees, students along with a teacher and two local mountain guides successfully reached the summit of the Akadake at 2,899 meters. The mountain also benefited from this peak tour. Before setting off, the team worked to carefully repair the hiking trail.

## Pico de Aneto 3,404 m, Spain

After enjoying lunch together in the old town of Benasque and walking to the Renclusa hut, the next morning the team set off for the summit at 5.45 a.m. At 11.20 a.m., the «On Wheels Team» with Héctor Barberà and Rafa Valls reached the summit of the Aneto at 3,404 meters. Smiling faces all round, with lots of photographs taken and videos recorded.
