MICROWAVABLE	NO

Dishwasher use

Nalgene bottles and containers are dishwasher safe. However, difficulties can occur if loose caps come into contact with the heating element which can melt them. Secure bottles carefully, or place them in a small washing basket away from the heating element.

Note that some dishwasher manufacturers now mount the heating element on the top of the machine. Always place your Nalgene products on the rack farthest from the heating element.

MADE IN THE USA

Every product we manufacture in our Rochester, New York manufacturing site is subject to stringent quality assurance procedures. Our ISO 13485 compliant facility is also registered with the U.S. Food and Drug Administration as a Good Manufacturing Practices (GMP) facility, which further demonstrates our consistent devotion to customer satisfaction.

A BRIEF HISTORY

How did our bottles get so popular?

After Chemist Emanuel Goldberg developed the first plastic pipette holder in 1949, he founded the Nalge Company headquartered in Rochester New York. The company soon branched out into other state of the art polyethylene labware items, all of which carried the Nalgene brand. As Nalge Company grew, an increasing number of employees were discovering new applications for the products they made. Many returned from weekend excursions reporting that the smaller plastic bottles manufactured with such care for scientific lab use also worked well as leakproof beverage containers. By the 1970s, this “unofficial” use for Nalgene bottles became so widespread, the company decided to create an entire division devoted to meeting the needs of outdoor enthusiasts.

Nalgene® Outdoor Products are sold on our website and through authorized dealers around the world.

For ordering information, a dealer list or technical assistance, call 800-625-4327 or 585-586-8800, or visit www.nalgene.com.
